Project

Creative Agency (MERN Project) -- [Live](#) || [Client](#) || [Server](#)

- Responsive MERN Stack, fully responsive & IT support project with firebase authentication, admin authentication, persistent login and dashboard functionality for customer and admin.
- Only Admin can add new service & can see all service that user took & can create new admin.
- Customers have ability to register in available course, check status of course(s) registered, and provide feedback.
- **Technology:** React.js, Node.js, Express.js, MongoDB, Bootstrap.

Volunteer Network (MERN Project) -- [Live](#) || [Client](#) || [Server](#)

- This is a social site. Where any person register can help ordinary people & helpful to do social work. Beautiful layout and responsive design.
- Consumers can take any volunteer services & see this services & cancel this service.
- This site has an admin panel. Admin can add any service dynamically & delete any service from the admin panel.
- Users can see some particular services by using search.
- **Technology:** React.js, Node.js, Express.js, MongoDB, Bootstrap, Material UI.

Project

Apartment Hunt (MERN Project) -- [Live](#) || [Client](#) || [Server](#)

- This is a fully responsive group project where I am working with a team & we are using 'ZIRA' for communicating.
- The main purpose of this project is adding house and booking house with details.
- If someone wants to grow his house then he or she will say 'admin' & the admin can add his or her house in this application with the authentication process.
- Users can see his or her house details by clicking 'view details' and can send booking request for that house with pending status.
- If users want to find a specific house for booking then he can be using search & Admin can change status.
- **Technology:** React.js, Node.js, MongoDB, Firebase, Mongoose, Express.js, Bootstrap, React Bootstrap, SCSS, Redux, HTML, CSS

Travel Guru(Front-End Web Project) -- [Live](#) || [Client](#)

- This is a travel agency Web Site.
- This site only focused for travelers. They can select their place and see some hotels by authentication.
- The travelers can also see their destination map from this site.
- They can set their date for traveling & can see some hotels in this application.
- **Technology:** React.js, Bootstrap, Material-UI, HTML, CSS
